EXPERIENCE

Front-end Developer Intern | Exelon Circuits   **May2024-July2024**

- Effectively contributed to user interface optimization for web applications.
- Collaborated with teams to implement responsive designs.
- Ensured high code quality and optimized performance.
- Participated actively in the agile development process.
- Utilized React JS, Nuxt JS, JavaScript, and modern frameworks to create seamless and engaging web experiences.

TECHNICAL SKILLS

- HTML
- Mongo DB
- CSS
- Express JS
- Javascript
- React JS
- MY SQL
- Node JS

PROJECTS

Appointment Management System

- Diligently worked on a Doctor's Appointment System, enabling users to seamlessly book slots and effectively manage appointments.
- Primarily focused on front-end development using React to proactively create an intuitive and highly responsive user interface.
- Strategically aimed to streamline the appointment booking process, significantly reducing booking time by 25% and notably enhancing the overall user experience.

Community Management System

- Effectively collaborated with a group of peers to proactively develop a Community Management System tailored for a specific community.
- Tracked donations and maintained an accurate family tree, improving data accuracy by 35%.
- Designed with simplicity in mind, making it easy for the user to navigate and manage independently as the sole administrator.
- Substantially enhanced the community's ability to easily organize and access vital information, notably increasing user engagement by 30%.
